

BOOTSTRAP - LIMBAS CROWDFUNDING

OUR PHILOSOPHY:

The full version of LIMBAS is free! New functions in LIMBAS are often financed by customer projects. This results in 3 - 4 updates over the year, the functions of which benefit everyone who uses LIMBAS.

DEVELOPMENT:

Sometimes there are developments that should be incorporated into LIMBAS that are beneficial for all users, but are not required in any project. This includes adjustments to new technologies or the revision of the layout. The development time that flows into these projects must also be financed. Of course, the LIMBAS team puts a lot of personal effort into these projects. Since we also want to reward our employees fairly for their work, we are dependent on paid customer projects and innovations that are not financed by customer projects are often neglected.

HERE WE NEED YOUR SUPPORT:

You can support us to keep LIMBAS at the high quality level and to introduce new functions. You can invest development days for features you like so that new functions are available to you more quickly.

CURRENT PROJECT:

We are working on giving the LIMBAS layout a "makeover". So that the whole thing is much faster and easier in the future, we are in the process of re-implementing our layout based on the common front-end framework "Bootstrap".

TOGETHER TO THE TARGET - WE WANT TO SUPPORT THE LIMBAS PROJECT WITH:

1/2 programming day for 425,- Euro Company:

_____ **Programming days at 850,- Euros each** Contact person:

_____ **Euros** Date, signature:

Thank you for participating in the Limbas project. After your registration we will send you a separate invoice to the desired amount/programming days.

Your LIMBAS team
